retain the beneficial properties of virgin PET, such as strength, clarity, and thermal stability. Certified with RoHS, REACH, and GRS standards, Our rigid RPET sheets are a top choice for packaging applications, meeting both environmental and industrial requirements. **Customized is also available.** chenxiangxm@hgqyplastic.com <mailto:chenxiangxm@hgqyplastic.com> [Inquire Now](#)

Product Detail

PRODUCT DESCRIPTION

PRODUCT NAME	RPET SHEET/RECYELED PET SHEET
ITEM NUMBER	HS-RPET-01
SIZE	1220X2440, CUSTOMIZED
COLOUR	CLEAR, COLORED, CUSTOMIZED
THICKNESS	0.12MM - 6 MM
WIDTH	MAX 1400 MM.
APPLICATION	THERMOFORMING, BLISTER, VACUUM FORMING, DIE CUTTING, ETC.
FEATURE	ANTI-FOG, ANTI-UV, ANTI-STATIC, ESD (ANTI-STATIC, CONDUCTIVE, STATIC DISSIPATIVE), PRINTING, ETC.
PRODUCTION CERTIFICATION	ISO-9001, ISO-14001, IDFL,SGS CERTIFICATED

If you have customized needs, please contact me!

RPET (recycled polyethylene terephthalate) sheets are made from recycled plastic and are ideal for packaging applications, offering outstanding versatility, durability, and sustainability. They are the environmental benefits of recycled material, supporting a circular economy. rPET sheets meet food safety certifications and industry standards and are economical materials. HSQY PLASTIC offers rPET sheets made from up to 100% post-consumer recycled PET (rPET). These sheets retain the beneficial properties of virgin PET, such as strength, clarity, and thermal stability. With RoHS, REACH, and GRS Certificates, Our rigid rPET sheets are an excellent choice for packaging.

PRODUCT FEATURES

Excellent High Transparency

RPET sheets have the same excellent clarity as PET plastic sheets, which allows the packaged product to be seen, making it ideal for packaging where product visibility is important.

Easy to Thermoform

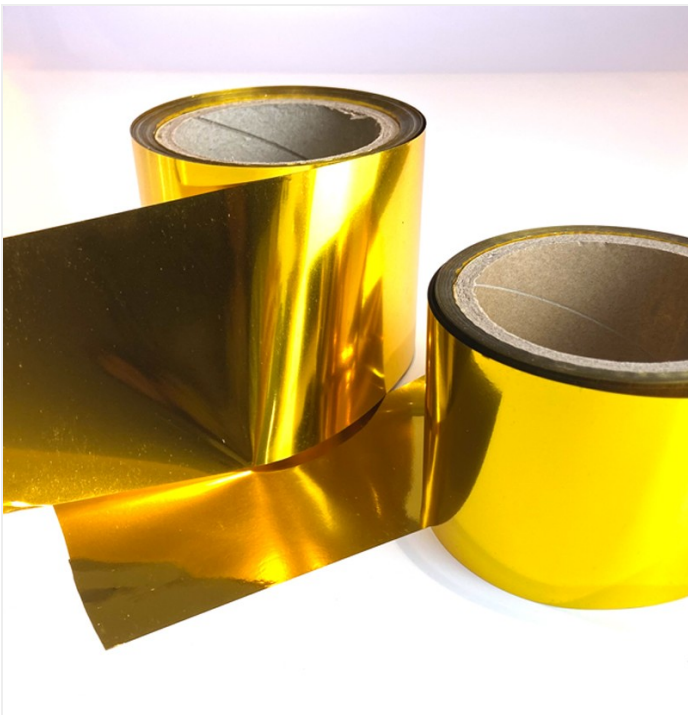

RPET sheet has excellent thermoforming properties, especially in deep drawing applications. No pre-drying is required before thermoforming, and it is easy to produce products with complex shapes and large stretch ratios.

Environmentally Friendly and Recyclable

PET plastic is 100% recyclable. Recycled PET sheets can significantly reduce the impact on the environment and help reduce environmental pollution and carbon emissions.

High-strength, Impact-resistant, Good Chemical Resistance

RPET sheets are lightweight, high-strength, impact-resistant, and have good chemical resistance. They are non-toxic and safe, making them suitable for use in packaged food as well as retail, electronic, and other products.

WHY CHOOSE HSQY

As a reliable PET sheet supplier, we have been committed to providing high-quality PET sheets for the packaging industry. PET plastic is an environmentally friendly thermoplastic material. Good mechanical properties, high dimensional stability, impact-resistant, Anti-scratch, and anti-UV properties make PET sheets a good choice for various applications across many industries.

HSQY Plastic is a professional PET sheet manufacturer in China. Our PET sheet factory has over 15,000 square meters, 12 production lines, and 3 sets of slitting equipment. The main products include APET, PETG, GAG, and RPET sheets. Whether you need slitting, sheet packaging, roll packaging, or custom weights and thicknesses, we will help you find the best solution.

CHOOSE US, CHOOSE RELIABLE QUALITY AND SERVICE

Profession and experience making us stably doing greatly in design service and quality production for you. Efficiency team to ensure quick settling all your questions and concerns. Win-win conception as our action guide that we've always been doing well with our current partners to offer best price-performance for you.
